HEAVY DUTY BALL CARTS

LIFETIME WARRANTY

OVERVIEW: Tired of those cheap, low quality ball carts that don't make it though one season before the wheel brackets get bent. You know the ones with the bright chrome finish that won't roll over a door threshold because the wheels are 1" diameter. At Pro-Bound® Sports we got really tired of sending out replacements for the ones we had sold. **SO WE FIXED THE PROBLEM!** We designed our own. Of the hundreds we have sold, we have never had to replace a single part.

SIZES: Pro-Bound® Sports offers three sizes that will fit almost any budget. The 3 x 4 will carry 12 standard men's basketball; the 4 x 4 will carry 16 standard men's basketball. And, where storage is an issue, consider our six tier ball cart. It stores 18 standard men's basketball in about the same floor space as a file cabinet.

WHEELS: The wheels selected for this product are full swivel, 3" diameter, hard core/soft tread. The very same wheels we have used for years on other high quality products we manufacture. These wheels won't mar your floors and even have a tendency to shed particles that normally become imbedded in other types of wheel. The large diameter also provides better rolling over not so smooth surfaces.

CONSTRUCTION MATERIALS: Ball support rails are made of 7/8" diameter tubing. Although, they will support a 200 pound person, we don't suggest you use this ball cart in place of a ladder. The ends of each cart are made of 16 gauge sheet steel. The end panels are ideal for your school name or logo.

FINISHING: Each ball cart is painted using durable, high gloss, white powder paint.

WARRANTY: These ball racks carry a full life time warranty on all parts except the wheels and paint. Even if you back over it with a truck, we'll replace the damaged items. All you pay is the shipping.
